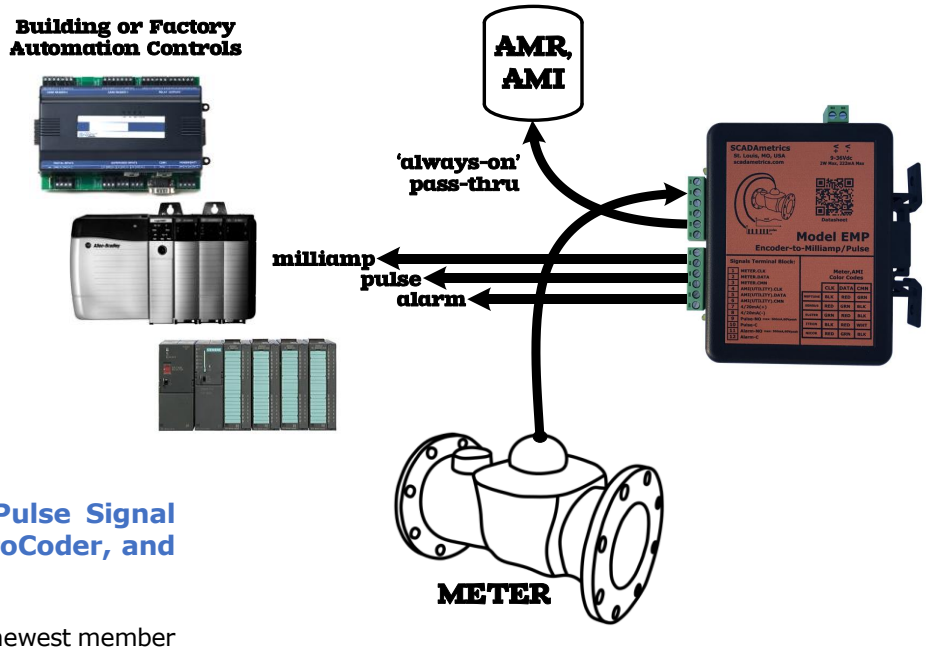
SCADAMETRICS®

The Signalizer™

Model EMP – US Patent No. 11,041,738



The Versatile 4-20 Milliamp and Pulse Signal Source for Neptune(1) MACH-10, ProCoder, and E-CODER Water Meters!

SCADAmetrics® is pleased to introduce the newest member of its DINstrumentation™ series – **The Signalizer™!**

This new electronic signal generator for water meters provides a 4-20 milliamp (flow) output and a dry contact pulse (per volume) output! – while still maintaining the meter's ability to be co-connected to an AMI/AMR endpoint!

Meter Owners have traditionally been required to make a weighted buying decision: encoder-type meter?... or milliamp/pulse-type meter? **The Signalizer** allows you to easily have both with the same meter!

The Signalizer utilizes the popular encoder signal from the water meter to generate both a 4-20mA rate-of-flow signal[1] and a dry-contact pulse-per-volume signal. …And because **The Signalizer** is outfitted with an integral pass-thru port, it can co-exist with an AMI/AMR system(2). Even if power is removed, the pass-thru port is always functional – ensuring continuous connectivity to the AMR/AMI system!

The Signalizer is compatible with the Neptune PROCODER, E-CODER, and MACH-10(3) registers.

(1)**Encoder Resolution** – a high-fidelity 4-20mA signal requires high-resolution encoder resolution (8+ digits). Therefore, for optimal SIGNALIZER performance, we recommend the MACH-10, PROCODER or E-CODER register. When the SIGNALIZER is utilized with a ProRead register, it will only produce a pulse output signal. The SIGNALIZER is NOT compatible with the R900i (integrated radio) versions of these registers.

(2)**Permitting** – If the meter is owned by the water utility, we recommend that you first contact its engineering department for permission!

(3)**MACH-10 Reaction Time** – In order to preserve the battery life of the MACH-10, the sample period of the Signalizer should be set to 300+ seconds, resulting in a signal reaction delay of up to 300s for both the 4-20mA and pulse signals. If a more "realtime" signal is required, then a mechanical meter with PROCODER or E-CODER register should be used.
